

INSCRIPTION INDEX. Ivo, Decretum

Decretum chiefly based on CP, with add. canons from M, B, S and ‘Harley’ group. It does not include the appendix to bk 16 found only in F.

This is a deliberately ‘fuzzy’ index. In order to keep broadly similar inscriptions as close together as is reasonably possible, they have been standardised in several ways. Brackets give some indication of the different forms here lumped together, but only a general one. Where c. numbers are followed by another in brackets, this usually means that the mss are divided – though numbers found only in M are rarely recorded, and deviations in copies other than P are entered occasionally and inconsistently. Entries are in square brackets where the inscription is either partly an inference, or can only be extracted from the text itself, or is a variant. It should be stressed that this is a rough index to what the inscriptions say, not to actual formal sources.
