Concordance between Panormia, *Decretum*, Arsenal 713B, the Coll. in Four Books and Gratian.

This is simply a finding list. Its chief purpose is to provide a guide to analysing further manuscripts, and the references are reduced to the barest minimum. For the manuscripts of the *Decretum* I have used a modified version of the scheme used by Landau in his fundamental study¹. It should be read in conjunction with the list of manuscripts, and particularly with the *Panormia* Conspectus, which records many more additions than are noted here. Manuscripts listed there have been scrutinised throughout for additions and omissions up to 8. 136. The references to the Collection in Four Books are taken essentially from the description by Gilchrist, supplemented by the analysis of the enlarged form found in London, BL ms. Arundel 173 by Fowler-Magerl. Gratian references in italic are to canons found in the 'Vulgate' but not in the earlier recension, and exclude more remote parallels that are noticed in the main text.
